## PRESS RELEASE

### Giesecke & Devrient's CloudPay Solution Integrates Visa Token Service for Issuer Wallets

Munich, April 19, 2016 – Giesecke & Devrient (G&D) announced today the integration of its Convego CloudPay solution with Visa Token Service (VTS). G&D's Convego CloudPay solution provides provisioning and life-cycle management services for payment applications on HCE (Host Card Emulation) enabled mobile devices. The relationship with Visa allows G&D to request and provide payment tokens from VTS to Visa issuers' HCE mobile wallets.

Visa Token Service is a new security technology that replaces sensitive payment account information found on payment cards, such as the 16-digit account number, expiration date and security code, with a unique digital identifier that can be used to process payments without exposing actual account details. Visa Token Service provides an industry standard EMVCo-compliant service for the generation, life-cycle management and processing of payment tokens. Through the connection to VTS, G&D can enable the payment card tokenization in the provisioning and life-cycle management services that G&D CloudPay solution provides to the issuers' HCE mobile wallets.

"Integration of our CloudPay solution with Visa Token Service enables us to provide a single service interface to Visa issuers for efficient and secure implementation of mobile payment services, including seamless payment card tokenization," said Edgar Salib, Group Senior Vice President Financial Institutions division at G&D. He adds that "This is a solution based on the industry standards for issuing banks that want to enable their own digital wallets."

**Giesecke & Devrient**

Creating Confidence.

As digital payments are increasing worldwide, the mobile channel has become a major focus for the issuers and other stakeholders for the development of new payment services to consumers. The relationship between Visa and G&D enables financial institutions to develop and offer their own mobile wallets, with issuer's own brand on top of the wallet, to their customers.

### **About Giesecke & Devrient**

Giesecke & Devrient (G&D) is a leading international technology provider headquartered in Munich, Germany. Founded in 1852, the Group has a workforce of ca. 11,400 employees and generated sales of approximately EUR 2 billion in the 2015 fiscal year. 58 subsidiaries and joint ventures in 31 countries ensure customer proximity worldwide.

G&D develops, produces, and distributes products and solutions in the payment, secure communication, and identity management sectors. G&D is a technology leader in these markets and holds a strong competitive position. The Group's customer base mainly comprises central and commercial banks, mobile network operators, business enterprises, governments, and public authorities.
